EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steven Greenfield on December 18, 2003.

The application has been amended as follows:

In the claims:

Claim 12, line 2, please delete "with respect", 2nd occurrence

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: it is neither anticipated nor obvious over the prior art of record to have a device for depositing a film onto a surface of a substrate having a circular profile as claimed by Applicant in claim 1 comprising at least one collimator having circularly spaced sheets establishing passages through the collimator that are circular and angled in a radial direction relative to the circular profile of the substrate.

3. It is also neither anticipated nor obvious over the prior art of record to have a device for depositing a film onto a surface of a substrate having a circular profile as claimed by Applicant in claim 11 comprising at least one collimator having radially spaced sheets establishing passages through the collimator that are angled obliquely relative to the substrate surface.

Art Unit: 1753

4. US 5,885,425 to Hsieh et al. (Hsieh) discloses a collimator, but the passageways are not circular as required by claim 1 (See Figure 8), and the sheets are not radially spaced as required by claim 11 (see Figure 8). Modifying Hsieh to have such limitations would require hindsight.

5. US 5,597,4662 to Cho discloses a collimator, but the passageways are not circular, they are honeycombed and the collimator is not made of radially spaced sheets or circularly spaced sheets. The collimator of Cho is all one piece with several solid sections. There are no sheets forming the collimator. Modifying Cho to make the collimator with sheets would require hindsight.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
